

AE72 & AE73 CONFETTI GERBS

AE72 Small Confetti Gerb™

Will shoot 10 lbs. of Aerofetti or Turbofetti in 20 - 30 seconds, to heights of over 50'. Can also be constantly fed for a continuous effect. Manually operated and no electricity required - just pull a lever to release the CO₂ pressure and launch your products sky high. Can be used with confetti, Aero-Puffs, feathers, nerf balls, promotional items, etc. Perfect for stadiums, parade floats, or any large festivity. Top quality - built to last. Operates from refillable CO₂ tank (not included). Typically uses one 50 lb. tank or two 20 lb. tanks (borrow them from the soda guy!). While launching, consumes 1 lb. CO₂ per second, so tank size requirements are dictated by effect requirements. Includes: Hoses and fittings for connecting either one or two tanks, and assorted confetti.

Specifications:

Power: CO₂
Remote: None
Dimensions: 9-1/2" x 34" x 36"
Weight: 37 lbs.

AE73 Large Confetti Gerb™

Jumbo version of AE72. Will blast 20 lbs. of Aerofetti™ or Turbofetti™ to heights of over 100' in 50 seconds. This cannon was recently used on The Rolling Stones "Bridges to Babylon" tour, and Super Bowls XXXII – XXXIV. Also used at MGM Grand and Universal theme parks. Operates from refillable CO₂ tanks (not included). Requires two tanks, 20 lb. or larger. The Gerb consumes 2 lb. CO₂ per second, so two 20 lb. tanks will yield 20 seconds of operation, two 50 lb. tanks will yield 50 seconds, etc. The Gerb can be refilled with confetti, and depleted tanks exchanged for full ones, all in less time than it takes for the previously launched confetti to fall to the ground. This allows you to launch confetti virtually non-stop, if desired. Tanks can usually be rented locally at very economical prices. Includes: Hoses and fittings for connecting two tanks, and assorted confetti.

Specifications:

Power: CO₂
Remote: None
Dimensions: 12-1/2" x 52-1/2" x 54"
Weight: 77 lbs.

Confetti Gerbs use high-pressure liquid CO₂ tanks with a siphon tube. (They're the same type used for soda fountains.) These tanks can usually be rented and/or filled at any gas, welding or fire extinguisher company.
