

**NEW!**

# MINI SNOW MACHINE

This snow machine has exceptional output for its price and size. It delivers almost as much snow as its daddy, the #BM60 Snow Machine.

It's simple - just plug it in, fill with our superior #BM61 Snow Fluid, and press the button on the back of the machine. Or mount it overhead and use the included 25' remote to start and stop the snowing effect.

The output of this machine is comparable to the original #BM60 with the flow rate set at 75%. It's a terrific value. This machine is half the price of the regular model, so now you can cover double the area at no additional cost! (Use fans to expand your coverage even more.)

## **Specifications:**

Dimensions: 6"W x 7"H x 13.5"D  
Weight: 5 lbs.  
Power: 120V (230V also available)  
Warm-Up Time: None  
Output: foam, snow-like "flakes" that "melt" when they land and don't leave sticky or slippery residue  
Fluid: requires **Theatre Effects Snow Fluid** (don't use cheap fluid - it leaves a sticky residue)
