

#ULF2 ULTRA 2 FIRING PANEL

Read these directions very carefully. This product uses flammable material and is for professional use only. The manufacturer is not responsible for any injury or *liability* that is the result of the user's failure to follow the specific instructions stated below.

DIRECTIONS:

Take one or two flash devices and plug them into the outlets in the Firing Panel using extension cords #18 gauge or heavier (#16, #14 or #12). Both outlets are controlled by the same switch, so everything plugged into the Ultra 2 Firing Panel will go off at the same time. When the footswitch is pressed, ignition power is supplied to your devices. Ignition power is only being supplied while the switch is held down, so it's impossible to leave the switch "on".

To test, take one or two Ultra Flash System products with test fire indicator lights, remove their igniters and plug them into the Ultra 2 Firing Panel. Press on the switch and verify that the indicator lights on the Ultra Flash products light up.

These two Ultra Flash products can now be loaded, and their Surefire Igniters installed, with your complete confidence that they will go off when you press the switch.

CAUTION

Be sure the operator has a clear view of each device.

Be sure each device is far away from anything flammable, such as drapes, curtains, painted props and your audience. Note any overhead obstructions to verify that there is enough height clearance.

The Panel is not designed to operate anything other than flash devices.

Although the system is easy to use, it is the manufacturer's intention that it be used only by a person who is experienced in the fields of pyrotechnics and electrical wiring.

WARNING!!!

Read these directions carefully and follow them exactly. Misuse is dangerous. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated above. This product is manufactured without any warranties, express or implied. It is for professional use only. It is not sold to minors. For more information, consult the technical manual "Special Effects with Fire and Smoke" available from us or your dealer.

DANGER! USE AT YOUR OWN RISK!
