

## #ULF4 ULTRA 4 FIRING PANEL

Read these directions very carefully. This product uses flammable material and is for professional use only. The manufacturer is not responsible for any injury or *liability* that is the result of the user's failure to follow the specific instructions stated below.

### **DIRECTIONS:**

Take your flash device and plug it into an outlet in the Firing Panel using an extension cord #18 gauge or heavier (#16, #14 or #12). The outlet you used has an adjoining pushbutton switch associated with it. When this switch is pressed, ignition power is supplied to your device. Up to four devices can be plugged into this Firing Panel, and each device will be powered by the switch next to the outlet into which it's plugged.

The switch in the center is the master switch. It must be held down while pressing one of the four outside switches for ignition power to be supplied to your device.

To test, take four Ultra Flash System products with test fire indicator lights, remove their igniters and plug them into the Ultra 4 Firing Panel. While holding down the center switch, press each of the outside four switches, one at a time, and verify that the indicator light on the corresponding Ultra flash product is lighting up.

These four Ultra Flash products can now be loaded, and their Surefire Igniters installed, with your complete confidence that they will go off when you press the appropriate button switches.

### **CAUTION**

Be sure the operator has a clear view of each device.

Be sure each device is far away from anything flammable, such as drapes, curtains, painted props and your audience.

Note any overhead obstructions to verify that there is enough height clearance.

The Panel is not designed to operate anything other than flash devices.

Although the system is easy to use, it is the manufacturer's intention that it be used only by a person who is experienced in the fields of pyrotechnics and electrical wiring.

### **WARNING!!!**

Read these directions carefully and follow them exactly. Misuse is dangerous. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated above. This product is manufactured without any warranties, express or implied. It is for professional use only. It is not sold to minors. For more information, consult the technical manual "Special Effects with Fire and Smoke" available from us or your dealer.
