

#ULV01 LOW V ULTRA COLOR VOLCANO

Read these directions very carefully. This product uses flammable material and is for professional use only. The manufacturer is not responsible for any injury or *liability* that is the result of the user's failure to follow the specific instructions stated below.

DIRECTIONS:

When you first take the Color Volcano out of the box, you will note two thin wires coming out of the side of the barrel and running to a red and black pair of terminals. This is the Surefire Electric Match. Look into the barrel, and note the electric match tip sticking into the center. When you replace the Electric Match (a new one is needed for each shot) you will want to install it so that it's positioned in the same manner. (It doesn't matter which lead from the match goes to the red terminal and which lead goes to the black terminal.)

Connect the Volcano to a LeMaitre or other approved controller with a 3 pin XLR pyro cable. Use the tester circuit built into your controller to ensure continuity. If you would fire the pot now, the Electric Match would create a spark.

Fill the barrel with Hercules Green Dot Smokeless Powder. The Electric Match tip should be touching the Powder.

The Volcano is now ready to fire. Be sure that there are no flammable objects or people within 10 feet. Press the fire switch and instantly create a column of fire that reaches up to 6 feet high and lasts for several seconds. Use Color Additive to make the flame red, green or white. Use Electric Sparkle Additive to add electrically crackling sparks to the effect. (Color Additive and Electric Sparkle Additive cannot be used simultaneously because the Sparkle Additive will cancel out the color.)

Optional: The Color Volcano can also be used to create a sonic blast (used as a Concussion Mortar). Use one teaspoon or less of Sonic Flash Powder; follow exactly the directions that accompany your powder. Wrap Powder in Flash Paper first to ensure ignition. When creating a sonic blast, ear plugs should be worn by all stage personnel. Overloading with powder will result in window breakage. **DO NOT UNDERESTIMATE THE DESTRUCTIVE CAPACITY OF THIS EFFECT.** Conduct a preliminary test in a safe location - you'll be surprised.

CAUTION

The Volcano generates in intense amount of heat.

For best results, use only Theatre Effects brand Surefire Electric Matches.

Do not reload until the barrel has cooled.

Always keep face away from barrel and never smoke while loading.

Wear safety glasses.

Do not fire in a location where flammable objects are within 10 feet. Observe correct safety distances for the particular size of the effect being used.

TIPS:

For added safety, use a LeMaitre brand controller. All LeMaitre controllers include a test indicator and keyswitch lockout.

Some residue may build up in the barrel and will have to be scraped off with a knife from time to time.

WARNING!!!

Read these directions carefully and follow them exactly. Misuse is dangerous. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated above. This product is manufactured without any warranties, express or implied. It is for professional use only. It is not sold to minors. For more information, consult the technical manual "Special Effects with Fire and Smoke" available from us or your dealer.
