

## #ULV06 LOW V ULTRA FLASH PORTAL

Read these directions very carefully. This product uses flammable material and is for professional use only. The manufacturer is not responsible for any injury or *liability* that is the result of the user's failure to follow the specific instructions stated below.

### **DIRECTIONS:**

When you first take the Ultra Flash Portal out of the box, you will note two thin wires coming out of the side of the channel, running to a red and black pair of terminals. This is the Surefire Electric Match. Look into the channel, and note the electric match tip sticking into it. When you replace the electric match (a new one is needed for each shot), you'll want to install it so that it's positioned in the same manner. (It doesn't matter which lead from the match goes to the red terminal and which lead goes to the black terminal.)

Connect the Ultra Flash Portal to a LeMaitre or other approved controller with a 3 pin XLR pyro cable. Use the tester circuit built into your controller to ensure continuity. If you would fire the portal now, the electric match would create a spark.

Lock your controller in the "off" position. Now pour a small trail of White, Red or Green Flash Powder, Colored Smoke Powder, or Hercules Green Dot Smokeless Powder into the channel.

It is preferable, though not always necessary, for the electric match tip to touch the Powder. The Portal is now ready to fire. Be sure that there are no flammable objects or people within 10 feet. Arm your controller and press the fire switch to instantly create a flash and a puff of smoke.

### **CAUTION**

Do not reload until the Portal has cooled.

Never fire at people, animals, or flammable objects.

Never look into the Portal when the device is loaded.

Always conduct a preliminary test in a safe location, so you'll know how much clearance space you need. Use 1/8 cup of Hercules Green Dot, or 1/2 oz. of White A&B Flash Powder for the preliminary test. Then adjust your loads accordingly.

Wear safety glasses.

Never smoke while loading.

Do not load the Portal directly from the bottle. Pour the Powder into a plastic teaspoon, and then empty the the spoon into the Portal.

Overloading the Portal with Powder may result in an explosion.

Never fire the Portal near curtains or on carpet.

Observe the correct safety distance for your particular effect (generally 10 ft.).

### **TIPS:**

For best results, use only Theatre Effects brand Surefire Electric Matches.

To ensure the safest operation, use a Theatre Effects or LeMaitre brand pyro controller.

For a different effect, try adding Electric Sparkle Additive.

### **WARNING!!!**

Read these directions carefully and follow them exactly. Misuse is dangerous. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated above. This product is manufactured without any warranties, express or implied. It is for professional use only. It is not sold to minors. For more information, consult the technical manual "Special Effects with Fire and Smoke" available from us or your dealer.

**DANGER! USE AT YOUR OWN RISK!**
