

# VIPER II

## Professional Fog Machine

- Very high output
- Compact size
- Quieter than most fog machines
- Operates at any angle, even straight up
- Smooth output even at low settings
- Uses safe water/glycol based fog fluid
- Continuous output
- Addressable DMX512 interface built-in
- Fully programmable digital timer built-in
- 0-10V analog interface built-in
- Stand-alone controls built-in
- Wired remote included, radio remote available
- Hanging yoke with drip tray available
- Safety cable rigging points built-in
- Hose ducting adapter available
- ATA style flight case available
- Digital technology
- Microprocessor controlled
- Sealed membrane touch control panel
- Automatic power on/off when DMX controlled
- Automatic start-up when timer controlled
- A terrific value for its price!

***The Viper II is a powerful German-made fog machine. Its robust construction and efficient design guarantees trouble-free operation. The vigorous output (up to 50') is infinitely variable, producing every desired effect from a wispy cloud to the thickest swamp.***

***The fogger will not shut down to reheat. Fog is always available on demand. DMX is built-in and the machine's controls are intuitive with results clearly indicated on the LED display.***

Size:	19" x 9.25" x 9.75"
Weight:	19 lb. (empty of fluid)
Power:	1300 Watt
Voltage:	120 VAC (230 VAC optional)
Warm-up:	approx. 7 minutes
Fog Duration:	continuous at 50%, 40 sec. max. burst at 100%
Consumption:	3.5 fl. oz. per minute at maximum output 1 fl. oz. per minute at continuous output
Control:	DMX512 and Analog 0-10V and Stand-alone
Protection:	Heater Block - Thermostat Pump - Thermal Switch
