

FG90C TINY-COMPACT

SPECIFICATIONS	
Power Requirement	70 Watt
Voltage	12 V battery
Warm-up time	0.5 second
Fluid bottle capacity	1.5 oz.
Continuous output w/battery	10 minutes
Control	trigger button
Temperature control	microprocessor
Dimensions (w x h x d)	2-7/8" x 4" x 8"
Weight (including battery)	50 oz.

FEATURES

- By LOOK - Solutions made in Germany
- Very small dimensions
- Heats only when fogging
- Portable
- Continuous output - no reheat cycle
- Simple controls

Based on the technology of the Tiny-Fogger miniature fog machine, the Tiny-Compact is yet another tool to add to your special effects arsenal. This machine can be used in a wide variety of fields including theatre, theme parks, video, photography - wherever a small battery-operated fog machine is needed.

The Tiny-Compact heats up in less than one second for virtually instantaneous effects. Because of an intelligent control mechanism, the 12 V battery supplies energy only when necessary so the fog time is greatly increased compared to other battery powered machines.

The operation of the machine is easy: Slip the battery into the case, fill the 1.5 oz. fluid tank, and it's ready to go!

The Tiny-Compact can be easily operated with one hand, at any angle.

Optional accessories include a Digital Timer (FG94), DMX Interface (FG93) and a Wireless Remote Kit (FG92).
