

**PYROWIZARD UFK
IGNITION SYSTEM**
Catalog No. MG35

Read these directions very carefully. This product uses flammable material and is for professional use only. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated below.

Directions:

This product contains a battery pack with 6 foot leads and a table mount button switch. A "Dummy Battery" is also included, which allows the user to adjust voltage accordingly for various applications, as noted below.

At the end of the leads are two grey quick-connect terminals. These are called Pyro Clips. They act as "splice clips" and save time during installation while removing nearly all possibilities of your wires shorting out or accidentally getting pulled from their proper place.

Note how each of the products from our UFK line of devices has two wires. Choose a device and attach the two wires to the gray Pyro Clips on the battery pack. Simply squeeze the open end of the Pyro Clip and insert the wire into the opening. Make sure the clips hold the wires securely. If necessary, bend (double over) the wires. It doesn't matter which wire goes to which Pyro Clip.

Put 2 AA alkaline batteries in the battery holder; insert them so that they are facing in opposite directions (as marked on the metal base). Press the red firing button to fire your device.

Please Note:

When being used with IG03 Surefire Igniters, the use of 2 AA batteries is recommended. However, when used with the MG33 Wide Angle Flash Ejector or the MG34 UFK Flash Gun, it is advised to use the included "Dummy Battery" to substitute one of the regular AA batteries in the Ignition System. This reduces the voltage from 3v to 1.5v and will greatly extend the life of the Glo-Plug used in that device.

Warning:

Read these directions carefully and follow them exactly. Misuse is dangerous. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated above. This product is manufactured without any warranties, express or implied. It is for professional use only. It is not sold to minors. For more information, consult the technical manual "Special Effects with Fire and Smoke" available from us or your dealer. DANGER! USE AT YOUR OWN RISK!
