

ULTRA 2 FIRING PANEL

Catalog No. ULF2

Read these directions very carefully. This product is for professional use only. The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated below.

Directions:

To test power to the Firing Panel, simply plug in the power cord and press on the switch. The indicator light will illuminate. This shows power is being sent to the outlets.

Both outlets are controlled by the same switch, so everything plugged into the Ultra 2 Firing Panel will go off at the same time.

For safety, power is only being supplied while the switch is held down, so it's impossible to leave the switch "ON".

The switch is made to be operated by a person's hand or foot, making for easy use in many applications.

One or more Air Cannons can be plugged into the outlets in the Firing Panel using extension cords #18 gauge or heavier (#16, #14 or #12).

Consult the directions that are included with your Air Cannon for more details.

Caution:

- Be sure the operator has a clear view of each Air Cannon prior to activation.
- The Panel is not designed to operate anything other than the Theatre Effects line of professional confetti/streamer electric air cannons.
- The Panel is not designed to be exposed to rain or water.
- Although the system is easy to use, it is the manufacturer's intention that it be used only by a person who is experienced in the fields of special effects and/or electrical wiring.

Warning:

Read these and related product directions carefully and follow them exactly. Misuse is dangerous.

The manufacturer is not responsible for any injury or liability that is the result of the user's failure to follow the specific instructions stated above. This product is manufactured without any warranties, express or implied, and is for professional use only.
